†Hybrid+ Colors

### Patented! Twister Lock and Cyclonic Locking System

.046"

- A** High Tension Structural Return  
•Puts pressure on the double thick fold-over "windload" nail hem to help keep it tightly closed down on the panel
- B** Double Thickness at Nailing Hem  
•Helps keep the siding on the wall even in high winds
- C** Nail Depth Guide  
•Helps keep nails from being driven in too tight and ensures that the siding will be able to move enough to help prevent buckling
- D** Drop Guard  
•Acts as a stop to help keep the siding panel from dropping too far down – or even out of the lock – while being installed
- E** Hook and Hold Twister Lock  
•Designed to grab the panel butt and snap it in place
- F** Wide Butt Design  
•Creates a distinct shadow line for a substantial look of quality
- G** .046" Thickness  
•Heavy duty for lasting performance
- H** EP-Xtra™ Foundation of Protection
